

ACCELERATE ADOBE WORKFLOWS WITH AVID NEXIS

Create better content faster

What if you could access your organization's entire media library from anywhere and share assets in a collaborative environment using your Adobe® Premiere® Pro editing system? Avid makes this possible, opening up a whole new world of possibilities for creative teams. With connection to Avid NEXIS® storage, Premiere Pro users gain powerful media storage capabilities, enabling them to collaborate with other Adobe users in real time and create better content faster.

ACCELERATE YOUR WORKFLOW

No editor should be an island—no matter what video editing software they use. Break down content silos, enable collaboration, and deliver content faster with integrated storage for Adobe Premiere Pro creative teams.

COLLABORATE IN REAL TIME

Enable a few or up to hundreds of creators to connect and share media. Avid NEXIS is extensively and continuously tested to optimize the workflow integration with Adobe Premiere Pro, providing real-time media delivery to your timeline at every frame.

FIND MEDIA FAST

Newly captured footage. A work in progress. Archived projects. If the content you seek sits in your Avid NEXIS storage, you can find it fast. Right within Adobe Premiere Pro.

EASILY MANAGE YOUR STORAGE FROM ANYWHERE

Gain great visibility into and control over your entire storage network with the easy-to-use HTML5 web-based Management Console. Easily reconfigure and reallocate resources on demand, as well as perform advanced monitoring and analysis, from a web browser.

KEY FEATURES

- › Create more content faster with a tightly-integrated shared storage solution
- › Access your organization's entire media library right from within Adobe Premiere Pro
- › Enable story editors to collaborate with other Adobe Premiere Pro editors
- › Browse, search for, and access Adobe projects and media across your entire Avid NEXIS storage system
- › Protect your projects, assets, and workflow easily by leveraging your Avid NEXIS user settings to control access
